Offer No.	109788
Summary of offer	<i>Export: Presence and fall detection device based on RF technology for elderly care.</i>
<b>Description of Offer</b>	
The company's device is a presence and fall detection device, mainly used for remote monitoring of elderly people. After a simple installation, it immediately begins to monitor the environment. Once a fall is detected, it will conduct a call to the pre-defined caregiver and call for help. It can be placed in the bedroom / bathroom since it maintains full privacy (no cameras), and the call for help is done passively, with no need for wearables / buttons. The product is >97% accurate. Additional health monitoring features will be supported in the future by our Gen 2 device, such as daily activity levels, daily patterns, gait analysis, respiration monitoring and security.	
Potential Partners	Distributors, integrators, elderly facilities, hospitals
Target Countries	South Korea, Germany
